

Project : Internet and Web systems: Week9

Application : Home Food

This is a Home Food application where user can order food prepared at home from this application. The chef also logs into the application where he/she can receive the order and prepare food for the user.

This Application is beneficial for busy working people, where they can just order the food and then pay from the app. They can pick up the food or opt for delivery option.

Technologies and Tools Used:

- 1.Java
- 2.Spring Boot Framework
- 3.MySQL Database
- 4.BootStrap,HTML,CSS
- 5.Thymeleaf
- 6.Maven
- 7.Hibernate
- 8.Inbuilt Tomcat Server
- 9.Bootstrap
- 10.pgAdmin
- 11.PostgreSQL

Problems Encountered:

There was an unexpected error (type=Internal Server Error, status=500).
An error happened during template parsing

Thymeleaf parsing error, it was resolved after correcting the errors in the html page.
Bean Errors while running the code. Few errors in the classes.

Additions:

Added the html pages shoppingcartcustomer and shoppingcartFinalize for customer to send their information and they get a confirmation message.

GitHub: Added files to main branch.
